CAREER OBJECTIVE

Fourth-year Artificial Intelligence Engineering student seeking an AI Engineering or Computer Vision internship to apply deep learning, model optimisation and reinforcement learning to the development of efficient AI solutions. Available from 29 March 2027 for 3–5 months.

EDUCATION

Xiamen University Malaysia Sep 2023 – Sep 2027 (Expected)
Bachelor of Engineering in Artificial Intelligence | CGPA: 3.77/4.00
Relevant coursework: Computer Vision, Deep Learning, Advanced Machine Learning, Natural Language Processing, Deep Reinforcement Learning, Advanced Data Analysis, Software Engineering, Linear Algebra, Principles of AI.

PROJECTS EXPERIENCE

DenseNet-121 Backbone Integration in YOLOv8n for Paddy Disease Detection Apr 2026 – Present

- Developed a compact DenseNet-based backbone with SPPF and C2PSA for nine-class paddy disease detection, retaining the YOLOv8n neck and comparing against YOLOv8n and DenseNet-121 baselines.
- Cleaned and partitioned image annotations; evaluated model variants through ablation studies using precision, recall, mAP, parameter counts and GFLOPs, and built a web demo for three-model comparison.

GhostConv and SimSPPF Integration for Marine Organism Detection Jun 2026 – Jul 2026

- Adapted DU-MobileYOLO with GhostConv and SimSPPF on URPC2020; achieved 75.36% mAP@0.5 (baseline: 74.23%) with 4.37M parameters (baseline: 4.70M), retaining deformable upsampling.
- Conducted baseline and ablation experiments to assess accuracy–complexity trade-offs and deployed an interactive detection demo with bounding-box visualisation and model comparisons.

Autonomous dPickleball Agent Training May 2026 – Jul 2026

- Trained and refined a PPO agent in Unity ML-Agents using curriculum learning, reward shaping and league self-play; experimented with reward and penalty configurations to improve autonomous gameplay.
- Contributed candidate policies and collaborative tournament evaluation to select the final team agent; the team placed second among 13 competing teams.

EXTRACURRICULAR ACTIVITIES

Head of Photography and Videography, Love in Action Feb 2026 – Mar 2026
Coordinated photo and video coverage, managed media workflows and edited outreach materials.

Head of General Affairs, XMUM AI Club Apr 2025 – Oct 2025
Coordinated event logistics and external collaborators to support a national-level AI event.

General Affairs Member, AIESEC XMUM Sep 2023 – Sep 2025
Supported administrative coordination and internal communication across committee activities.

ACHIEVEMENTS AND AWARDS

- **Dean's List:** Awarded for three consecutive semesters; ranked within the top 25% of the class.
- **XMUM Merit Scholarship:** Awarded for the four-year undergraduate programme (2023–2027).

SKILLS AND LANGUAGES

Programming: Python, C, C++
AI/ML: Machine Learning, Deep Learning, Computer Vision, Reinforcement Learning, CNNs
Frameworks and Libraries: PyTorch, TensorFlow, scikit-learn, Ultralytics YOLO, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, Unity ML-Agents, FastAPI, Gradio, Streamlit
Tools and Workflow: Git, GitHub, Docker, Jupyter, VS Code, Hugging Face Spaces, Render
Languages: English, Mandarin, Indonesian, Malay, Hokkien
Soft Skills: Communication, Presentation, Teamwork, Leadership, Problem Solving
